

LEONARD MARY PHILIP UDOH

WEB DEVELOPER / PRODUCT BUILDER

Nigeria • Developer Portfolio • Available for web development projects

Profile

Web developer focused on building practical, responsive web applications and product experiences. I work across frontend interfaces, backend logic, databases, authentication and AI-assisted development, with an emphasis on real working software rather than fabricated results.

Technical Skills

Frontend: Next.js, React, TypeScript, JavaScript, HTML, CSS, responsive UI. Backend: Node.js, Express, API routes, authentication, sessions and validation. Data: PostgreSQL, Prisma, MongoDB, Mongoose. AI: Python, PyTorch, Transformers, tokenizers and local AI tooling. Tools: Git, VS Code, debugging and deployment workflows.

Selected Projects

LeonardX — Freelancing and developer marketplace product with developer/client flows, profiles, hiring requests, messaging and project-oriented features.

Leonard College — School management web platform with admissions, student accounts, dashboards, authentication and administration workflows.

Qevli — Social platform project with profiles, feeds, reactions, comments, messaging, notifications and safety-oriented controls. Public project link is kept unchanged from the portfolio.

MyAI — Local AI engineering project exploring a decoder-only Transformer, tokenizer, training pipeline, memory and local tool interfaces. No public demo is claimed.

Education

Command Science Secondary School — Secondary school education. First School Leaving Certificate.

Certificates & Training

Phenix Africa — Certificate / training credential. Included as professional learning and certification, not as employment experience.

KodeHauz — Certificate / training credential. Included as professional learning and certification, not as employment experience.

Professional Focus

Web application development • Product UI/UX • Full-stack systems • School management systems • Developer marketplaces • AI-assisted software development

Portfolio

The portfolio includes the current public project links and a downloadable copy of this CV. Social media links are intentionally not invented; they can be added once the exact profile URLs are supplied.
